

ENVIRONMENTAL MANAGEMENT POLICY

JC'Kanz Integrated Services Ltd shall always continue to be guided on matters affecting the environment in which it operates. Specifically, our policy shall be to:

- Ensure that human wastes generated in and around work areas are adequately disposed according to client and statutory standards.
- Ensure that industrial waste such as oil, steels, scarp, etc. are properly disposed according to client and statutory standards.
- Ensure that, when used, industrial chemicals are handled by trained personnel and with standard approved equipment.
- Ensure that before commencements of work in any system, which has potentials for environment pollution, a client permit-to-work, as well as statutory permits are obtained. Also, emergency resources shall be mobilized “on-stand-by” for containment in the event of pollution.
- Investigate and report all operational incidents promptly according to client and statutory regulations.
- Train personnel in environment related matters.
- Encourage employee attitudes towards environmental conservation and discourage all acts capable of endangering our operations.
